COURSE DESCRIPTION

This is a 3-day course plus an optional 1-day “hands on” forensic skills workshop designed as a comprehensive review of concepts and principles in medicolegal death investigation, clinical forensic medicine, and forensic science. This course has been designed so that the participants may sign up for one or more days or the whole course, including the post-conference skills workshop.

The course is appropriate for death investigators, physicians, nurses and other healthcare personnel, law enforcement, attorneys, funeral professionals, donor personnel and students.

Forensic concepts covered include: specific functions of members of the forensic investigation team, chain of custody, child and elderly abuse and domestic violence, and basic understanding of ballistics and gunshot wounds.

- Secure your place for this significant course through early registration to advance your career options. Registration forms will be accepted as they are received.
- Quickly enhance your credentials as this “fast track” course is nationally acclaimed and recognized for its excellence.
- Accommodations and travel suggestions are available on the web site www.forensicmi.com

Course registration fees include daily continental breakfast, breaks and the course syllabus. The daily schedule is from 8:00 am to 5:00 pm, with a 1 ½ hour lunch break.

Complete details about the locations and accommodations are available at:
www.ForensicMI.com

and will also be sent with your confirmation letter.

Please note the daily schedule is subject to change.

- 50% discounts for 2 or more registrants from the same agency.

Course Director Contact: Mary H. Dudley, M.D.
(316) 204-9107 mdudley2@kc.rr.com

COURSE GOALS

At the end of the course, participants will be able to:

- Define terminology, as related to antemortem and postmortem findings, in order to accurately and appropriately document findings.
- Describe the functions of the medicolegal investigation team. Conduct a medicolegal investigation and effectively complete the paperwork for this process.
- Identify and recognize injuries, describe manners of death, legal issues and toxicology concepts.
- Identify the signs and symptoms of child abuse, pediatric fatalities, environmental hazards, and natural disease, in order to appropriately identify cause of death, assist the medical examiner and police in a forensic investigation.

COURSE DIRECTOR/FACULTY

Mary H. Dudley, M.D. is the Chief Medical Examiner for Jackson County, Missouri, in Kansas City, Missouri. She is board certified in Anatomic and Forensic Pathology. Dr. Dudley has been active in the field of forensic medical investigation for many years. She developed the first forensic nursing program in Colorado in 1994 and the first FMI Training course in 1996. She is active with the following associations and committees:

- National Association of Medical Examiners
- American Academy of Forensic Sciences
- International Association of Forensic Nurses
- National Disaster Medical Systems
- Disaster Mortuary Operation Response Team - DMORT

Dr. Dudley’s reputation and field experience on high-profile criminal cases and mass fatalities assures you of exceptional learning and skills development.

Dr. Dudley maintains a network of forensic experts as course faculty.

All participating faculty have extensive experience in the areas of forensic medical investigation and outstanding teaching skills.

CONTINUING EDUCATION CREDITS
